- 2 years since the biggest 1-day strike in our lifetime
- 1 year since the TUC agreed to investigate the possibility of a 1-day general strike

- And no let-up in the onslaught on our jobs, our services, our pay and our lives.

## ● TIME TO ACT!

If you feel it's time for the trade union movement in the UK to act together to force back the coalition government and all those thousands of councillors passing on their cuts, then this conference is for you. The future of the NHS, the welfare system, social housing and secure employment is at stake. We believe the trade unions must come together - now! - to defend everything our predecessors fought for.
